ANYTHING IS POSSIBLE WITH MYERS POWER PRODUCTS
Whether you need 5kV, 15kV, 27kV or 38kV distribution switchgear; for indoor or outdoor applications, Myers Power Products has the solution. Myers has been and continues to be a leader in the manufacturing and design of Medium Voltage Switchgear for more than 40 years and offers a wide range of Medium Voltage distribution equipment including Metal Clad, Metal Enclosed and Arc Resistant switchgear, Power Distribution Centers (PDC), Motor Control Centers, protective relay systems, non-segregated bus duct and circuit breakers. Whatever your requirement, Myers has a design to meet your needs. Myers' own best-in-class products can be integrated with multiple 3rd party manufacturers to bring you the most versatile and customizable solutions available in the market today; from simple indoor switchgear assemblies to stand-alone outdoor NEMA 3R equipment, to complex integrated Power Distribution Centers (PDC), Myers Power Products has the expertise to design, fabricate, test, install and commission our products to meet your specifications.

Myers Medium Voltage solutions are custom designed by our highly experienced in-house engineering team - whether your project is greenfield or brownfield, simple or complex, domestic or international; you can count on Myers Power Products for reliability, durability and flexibility.

With Myers, anything is possible!
Myers MetalClad Switchgear is available in multiple NEMA rated enclosures, including Indoor, Outdoor Walk-in (ODWI) and Outdoor Non-Walk-in (ODNWI) and can be provided as a stand-alone lineup, enclosed in a walk-in structure, integrated into a Power Distribution Center (PDC), or any other custom enclosure you may require. Whether you need a solution for power distribution, motor control, protection & control systems, or other customized application, Myers has you covered. GIS switchgear options provide for an inherently arc resistant design with a reduced footprint – consult a Myers engineer for additional information.
Myers Power Products manufactures Metal Enclosed Switchgear for applications where MetalClad Switchgear is not required. Our Metal Enclosed Switchgear is available in multiple NEMA enclosures as stand-alone switchgear, part of a unit substation, or other customized design configurations. Myers Metal Enclosed LoadInterrupters and Disconnect Switches offer you the choice between manually and electrically operated mechanisms in fused or non-fused applications.
Myers’ integrated unit substations are custom designed to meet your specifications and are close coupled, consisting of enclosed primary medium voltage equipment, a 3-phase power transformer (up to 5MVA), and enclosed secondary MV or LV equipment. Transformers are supplied to meet your requirements and include liquid filled, dry type, high fire point oil or silicon, vacuum pressure impregnated coil, or cast coil. Myers can design Unit Substations for nearly any application, including indoor, outdoor, skid-mounted, integrated in a PDC, and wheeled mobile configurations. Myers Power Products Skid-Mounted Substations are manufactured per NEMA201-1982 and IEEE 100-1977 standards.
Myers Power Products ArcRes Switchgear is designed to protect your personnel and equipment from the destructive energy and force of an arc flash incident. Our ArcRes Switchgear utilizes specially designed ducting to safely exhaust any arc flash incidents out of the area and away from your personnel and equipment. ArcRes Medium Voltage Switchgear is designed with vacuum circuit breaker and metal clad switchgear technology for voltage ratings between 5 kV and 15 kV and a GIS design is available for voltage ratings above 15kV.
### Myers Power Products

Myers can design, manufacture, and deliver an unlimited range of options for medium voltage electrical equipment and control in any number of various applications and enclosure types.

#### Power & Control Equipment
- **AC MV Switchgear**, 5kV – 38kV
- Motor Starters
- Protective Relay Panels
- Unit Substations
- DC Switchgear, 250 V – 1600 VDC
- SCADA Equipment

#### Enclosures
- NEMA 1, 3R, 4, 4X
- Blast Resistant
- Power Distribution Centers & Control House
- ArcRes Arc Resistant Type 2, 2B, 2C, & 2BC

#### Special Design Features
- Seismic Ratings
- Skid Mount Option
- Arc Resistant Design
- Wind & Weather Ratings / Designs

### Myers Circuit Breakers

Myers Power Products is a leading manufacturer of Medium Voltage Vacuum Circuit Breakers. Our HVF AC Circuit Breakers and FBK DC Circuit Breakers are available with or without Myers’ High Speed Tripping to provide you with flexibility in managing system coordination while incorporating personnel safety and downstream equipment protection. Whether you require fixed mount or draw-out type circuit breakers, Myers Power Products is the solution for your specific application.

#### HVF AC Circuit Breakers
- 5 kV – 38 kV Voltage Ratings
- 600 A – 4000 A Continuous Current Ratings
- 16 kA – 63 kA Interrupting Rating
- 2-Cycle Trip (optional)

#### FBK DC Circuit Breakers
- 300 VDC – 1000 VDC Voltage Ratings
- 1600 A – 12,000 A Continuous Current Ratings
- 60 kA – 200 kA Short Circuit Rating

### Protective Relay Panels

#### 5 kV - 500 kV Protection

Myers Power Products Protective Relay Panels and Custom Control Switchboards are engineered-to-order to meet your requirements for improved reliability, protection, and a higher level of communication & control for your power system. Our designs meet ANSI C37.21 for Control Switchboards with IEEE-693 racking designs for seismic qualifications.

#### Design Options
- Custom Control Panelboard
- Integrated into PDC
- Door & Wiring Harness
- Simplex
- Full Duplex
- Half Duplex
- Fixed & Swing Rack Cabinets
- Control Desk

---

**EQUIPMENT & ENCLOSURE OPTIONS**

**MYERS CIRCUIT BREAKERS**

**PROTECTIVE RELAY PANELS**

**5 KV - 500 KV PROTECTION**
Myers Power Products Non-segregated Bus Duct is available for AC and DC applications. Since each project is engineered to order, Myers Bus Duct offers you several options for construction, voltage & current ratings, and configuration. A combination of our in-house epoxy coating system (standard) or insulated sleeving (optional) is used to insulate the current carrying surfaces, and bus supports can be provided in glastic, porcelain, or cycloaliphatic materials. Our Bus Duct is available for indoor and outdoor applications; and the NEMA 3R design includes strip heaters with weather tight removable cover plates. Custom design and UL Field Labeling is available to meet your specific requirements.

**Construction**
- Aluminum or Copper Bus
- Silver or Tin plated Connections
- Epoxy Coating

**AC Bus Duct**
- 480 V – 38 kV
- 4,000 A Max

**DC Bus Duct**
- 250 VDC – 1600 VDC
- 15,000 A Max

**UL DESIGNS**
Myers Power Products' standard electrical equipment is backed by over 30 UL files for over 50 different products and designs. Our Medium Voltage Products & Solutions carry standard UL files but can be individually UL or 3rd party UL labeled for new designs as required.

Common applicable medium voltage standards for which Myers has associated UL files are:

**ANSI C37 – Medium Voltage Circuit Breakers**
- Myers Controlled Power (5kV-38kV)
- Eaton
- ABB
- Schneider Electric
- General Electric
- Siemens

**Load Interrupter and Isolation Switches Over 600V**
- Schneider Electric
- Eaton
- ABB

**FACTORY TESTING & FIELD SERVICE**
Achieve peace of mind in knowing that your medium voltage electrical solutions are fully functioning as designed, both at the factory and in the field.

**Factory Testing**
- ANSI C37.20 Production Test
- Current Injection
- CT Ratio and Polarity
- Mechanical Operation
- Dielectric Test
- Sequence Test
- Additional Testing (optional)

**Field Service**
- Retrofits & Retrofits
- Installation Supervision
- Startup & Acceptance Testing
- Site Certification
- IEEE Load Testing
- System Commissioning
- Training
- Preventive Maintenance
- Battery Testing & Monitoring
- On Site Troubleshooting & Repair
- In-House Repair & Rebuild
- EPA Certified Battery Disposal
PREMIUM PRODUCTS COME WITH PREMIUM SUPPORT.

Myers Power Products is committed to delivering the best products with the best product support throughout North America. Our pursuit of excellence continues long after our products are delivered and placed into service.

QUALITY DRIVEN NORTH AMERICAN NETWORK:

- **Myers Power Products customer support system** - with manufacturing facilities in California, Ohio and Pennsylvania, Myers provides live assistance from a dedicated staff of professional representatives for before and after Service Support, Engineering Support, Quality replacement parts, and for premium hands-on Field Service Support for all of Myers’ equipment. Peace of mind, guaranteed.

- **Myers’ network of premium sales representatives and distributors** located throughout North America are highly trained to assist you; providing you a one-stop-shop for acquisition, maintenance, and warranty services now and well into the future.

**MYERS Power Products, Inc.**
MYERS POWER PRODUCTS

Since 1950, Myers Power Products has been and continues to be, a global leader in the supply and integration of a wide range of electrical products. As both a manufacturer and systems integrator, we are trusted by thousands of companies worldwide to provide solutions ranging from medium voltage AC and DC power distribution switchgear and equipment, custom designed enclosures & power distribution centers, low voltage switchboards and panelboards to emergency lighting inverters, backup power systems and electrical service pedestals.

With manufacturing facilities throughout North America, Myers Power Products is uniquely positioned to serve you with the quality solutions you desire for your electrical distribution needs. Our in-house design support, engineering, fabrication, assembly and integration processes provide the expertise and flexibility to deliver both standard and customized, engineered-to-order solutions in a timely and professional manner; giving you the peace of mind that your project will be completed on-time and to specification, regardless of complexity.

Once your product is on site, our highly trained Field Service Team is ready and available when you need them. Myers' expert technicians can handle any need, ranging from start-up and commissioning to training on new equipment or troubleshooting, repair, and maintenance on in-stalled equipment.

Spare Parts and Service Contracts are also available to provide you with the peace of mind that your equipment will continue to operate safely and optimally well into the future.

RELIABILITY, DEPENDABILITY, FLEXIBILITY...TRUST IN THE POWER OF MYERS!

Myers Power Products has made every reasonable effort to ensure that the information contained in this brochure is accurate. However, we accept no responsibility for any errors or omissions. We reserve the right to modify designs, characteristics and products at any time for any reason or no reason with or without notice.
